

Football World Cup 2006

Rental arrangements

The Football World Cup 2006 was one of the largest media events which has ever taken place in Germany. Wellen+Nöthen was well prepared for the challenge and was represented in the area of TV coverage of the event as the provider of a very large amount of rental equipment. Around 600 LCD and CRT monitors as well as 130 digital Betacam, IMX and DVCPRO recorders together with large amounts of peripheral equipment were rented to national and international broadcasters. These included ARD, ZDF, WDR, Nippon TV from Japan and the Brazilian broadcaster Newco. In addition to this, operators of outside broadcasting units such as Wige Television, HDSigns and the World Cup organiser Thomson availed themselves of Wellen+Nöthen's rental pool.

Amongst other locations the equipment was deployed in the broadcasting centres of ZDF and ARD in Berlin and Cologne. At ZDF's Berlin location on the Potsdamer Platz Wellen+Nöthen installed 44 IMX video recording units and 120 monitors, whereas the requirements for the WDR studio A in Cologne were for a large number of digital Betacam recorders, Lynx test signal generators (5000 series), Wohler digital audio monitors and four 32 channel multiviewers and quadsplits supplied by Evertz. For Premiere the Munich firm HDSigns' broadcasting vehicle was equipped with Thomson HD cameras, EVS XT HD hard disk recorders and a variety of HDCAM recorders, whilst for the event organisers Thomson 3 slow motion trucks were equipped with around 400 monitor units in cooperation with Wige Television.
